

## HILL HOUSE SCHOOL

JH/sw

6 September 2019

Dear Parent/Guardian

### **Virtual Reality**

As parents, I would like to make you aware of the implications of using Virtual Reality at home and help you understand some of the concerns that exist.

Virtual Reality or VR as it is more commonly known, is the practice of creating computer-generated images or sometimes even entire worlds for a user to experience as if they were there. While virtual reality is perfectly safe on the whole (although sometimes you might feel like you are in real, physical danger) there are some things to look out for if you plan on giving it a try.

Due to the children's levels of maturity, I would ask you to monitor what your child is doing at home and please read the attached document so you are fully aware of what Virtual Reality is and how it operates.

As a school, we will support you with this by educating the children to use Virtual Reality effectively when they are old enough.

Thank you for your support with this matter, if you have any queries please do not hesitate to contact me.

Yours faithfully

Mr Jonathan Hall  
Head of Junior School
